

2 Minute Rule

- 1.** During the **FIRST** two minutes, explore the job site by walking and looking around at the work area (hands-on touch points) and adjacent surroundings. Identify conditions such as:
 - Critical indicators (meters) needed for task success.
 - Error precursors (at critical steps).
 - Industrial safety and environmental hazards.
 - Right unit, right component.
 - Sensitive equipment in the area.
 - Work area conditions inconsistent with those listed in, the procedure or discussed during the pre-job briefing.
- 2.** Talk with coworkers or supervisor about unexpected hazards or conditions and the precautions to take.
- 3.** Eliminate hazards, install appropriate barriers, or develop contingencies before proceeding with the task.
